TW11 GEL 500gm

Prevents Weld-Spatter Build-up on Welding Torches

***ANOTHER 'THE WORKS' PRODUCT GIVING THE
HIGHEST QUALITY AT THE RIGHT PRICE***

NEW PRODUCT

New Easy-Melt Gel base gives quick and easy coating which gives perfect coverage without dripping. Ideal for regular application and for those occasions when the torch is not always hot.

High Temperature Additives give long lasting protection against weld spatter build-up.

If you require semi-permanent dry powder coating protection then the only answer is The Works White Spatter Shield.. For jigs and fixtures the truly sensible permanent coating (dry powder) protection is The Works Jig and Tool Protect Spray. Ask for details.
