

## Product Data Sheet

### 897 Paste High Performance Cutting & Tapping Paste

- 897** gives **optimum tapping, drilling, reaming and threading** performance on:
- |           |                 |            |
|-----------|-----------------|------------|
| Titanium  | Stainless Steel | Molybdenum |
| Magnesium | Stellite        | Iron-Cast  |
- and other high tensile steels, where oil and fluid cannot be used.
- 897** is very economical. Increase savings on tool-life and labour cost. Eliminates sticking, binding and gouging. Guarantees premium finishes and leaves clean surfaces.
- 897** is for applications where tapping and cutting fluids are superseded or cannot be used. **Exceptional performance on hole-cut saws and roto-broaches**
- 897** is especially developed for extra heavy-duty tapping, threading, reaming, drilling, broaching, milling, etc. on ferrous and non-ferrous steel and high alloyed steel.

**Characteristics** Fast cutting performance  
Minimum wear on cutting tools  
Guaranteed close tolerance cutting performance combined with excellent tolerance finish.  
***Does not contain any volatile chlorinated hydrocarbons.*** Economical, time and labour saving.

**Available in** 500gm tins  
750 gram tins  
5kg bucket
